SKILLS

DATA

Pandas • Apache Kafka • SQL-Alchemy

DATABASES

MySQL • PostgreSQL • MariaDB

• MongoDB

OracleDB

LANGUAGES

Python • Javascript • Typescript

Java • C++ • Perl

WEB DEVELOPMENT

React • HTML • CSS • Flask • Django

Express • Node.js

MISCELLANEOUS

Git • Figma • \LaTeX

PERSONAL PROJECTS

FANTASY PREMIER LEAGUE VISUALISATION

[HTTPS://FPL-VIZ.WEB.APP/](https://fpl-viz.web.app/)

- Application for Fantasy Premier League players to chart their progress throughout the season
- Real time data will also be shown to aide the players in their decision making
- Stack: React, Flask and Express
- Hosted on Firebase

WACKO-RECO

[HTTP://WACKO-RECO.HAZIM.NET/](http://wacko-reco.hazim.net/)

- A Spotify track recommendation web app that suggests users songs based on chosen seed tracks or artists
- Stack: React
- Hosted on AWS (S3 and Route 53)

PROFILE

Programming enthusiast who enjoys building web applications on the side, while working as a Software Engineer. Dedicated to learning more computer science concepts, especially in the distributed systems space.

WORK EXPERIENCE

DBS SOFTWARE ENGINEER (SRE DEPARTMENT)

Jul 2024 – Present

- Converted to full time and taking up the same role
- Integrated with internal application that validates artefacts for Change Requests

NTT DATA SOFTWARE ENGINEER (DBS - SRE DEPARTMENT)

Sep 2023 – Jul 2024

- Developed an internal service management application that tracks changes and incidents of DBS applications
- Takes on enhancement and optimisation tasks to improve the application holistically
- Stack: HTML, Javascript, Perl, MariaDB

UBS SOFTWARE ENGINEER (NETWORK AUTOMATION)

Oct 2020 – Jun 2023

- Developed a web application for Data Center personnel to maintain their inventory. In production
- Implemented Django with Django REST Framework to replace legacy Web2Py RESTful API service
- Introduced React for frontend and converted Jinja2 templates into React components (notable dependencies: Material-UI, VisX)
- Set up Redux with Redux Toolkit to simplify state management and data fetches with hooks
- Upkeep data integrity of Network Inventory tables by writing Extract, Transform and Load (ETL) scripts and running cron jobs which updates our Data Warehouse
- Optimised queries of source databases by planning and redesigning data processing cycles and data workflows

RELEVANT EXPERIENCE

FINTechSG PROGRAMME

Aug 2020 – Oct 2020 | National University of Singapore

- Professional Certificate in FinTech Senior Developer (Level 3)
- Frontend and Backend Web development (Javascript, React, Database: MySQL, MongoDB)
- Docker and Kubernetes for containerisation

CERTIFICATIONS

- AWS CERTIFIED CLOUD PRACTITIONER
- AWS CERTIFIED DEVELOPER - ASSOCIATE
